

Solution Architect (f/m/d)

Locations: Jena, Dresden, Leipzig, Germany

For our young start-up company, dedicated to building first-class customer experiences, we are seeking a Solution Architect (f/m/d) for a permanent full-time position.

You will be part of our solution team with excellent career opportunities that offer leadership in technology combined with strong understanding of our customer needs. We have always differentiated from other teams with our unique hands-on approach that limits team size to people who stay close to our customers and translate their business needs into best in market technical solutions.

Continuous learning and delivery of results are the core features we are looking for. A passion for leadership, responsibility and a commitment to open and honest feedback complement these qualities.

YOUR TASKS AND RESPONSIBILITIES

As an experienced Solution Architect, you will lead all technical discussions with our customers and platform team to define the best solutions and participate in design reviews. You will be a key member of a team dedicated to writing test-based, clean and reusable code.

YOU ...

- will assist the complete development process, from customised omnichannel solutions.
- are involved in all phases of the solution projects for the customer: from the first customer contact to the planning and implementation of the project, with partners, developers and the involvement of customers.
- lead the technical aspects of implementations, including sprint planning, defining use cases and guiding developers through examples.
- control the complete stack from backend to web applications, develops the concept and design of solutions for new functions in close cooperation with all involved teams.
- drive risk assessment and mitigation activities
- will be a solution partner for applications involving developers and customers and will also take responsibility for technical reviews and post-launch adjustments.
- support with pre-sales activities and be in charge of project estimations.

YOUR PROFILE

As an experienced Solution Architect you are able to identify problems through critical thinking, you have analytical skills and in addition to your technical strengths you distinguish yourself through self-confidence, independent working methods, teamwork and clear communication?

YOU ...

- hold an University degree or successfully completed an IT related education program.
- 6+ years work experience ideally with ReactJS, JavaScript/TypeScript, Python, Golang, NodeJS or similar programming languages and taking on lead positions in relevant projects.
- have experience with business critical SaaS applications based on MicroServices Architecture.
- have the general understanding of Service-Oriented approach, Domain-Driven Design, S.O.L.I.D. principles.
- have experience collaborating with other Engineers in planning, prioritizing and executing assigned tasks within deadlines.
- create concept and design of solutions that are implemented according to CI/CD and test compliant criteria.
- have very good written and spoken English language skills.

EXTRA QUALIFICATIONS THAT WOULD BE GREAT TO HAVE

YOU ...

- have experience in building e-commerce systems and the associated handling / integration of ERP, CRM, OMS & fulfillment, payment systems as well as mobile applications
- are familiar with various software design models.
- have experience in solving business problems using a variety of programming languages.
- are familiar with some of the following technologies: Linux, Docker, RabbitMQ, nginx, Amazon AWS, REST-ful APIs, GraphQL, JavaScript Technologies such as Angular.js or other, HTML5, CSS3, git or SQL
- have any experience in agile development methods and sprint planning is an advantage.
- have very good presentation- and communication skills.

YOUR BENEFITS

- Excellent personal and professional opportunities
- Fast and short decision paths
- Flexible work organization with home office possibilities
- Free choice of your work tools: Work with a Macbook Pro or use open systems such as Linux or Windows.
- Team meetings and events - professional and fun
- And of course a great atmosphere in the team

WHO WE ARE

We are a young start-up with locations in Jena, Dresden and Leipzig (coming soon). Our central aim is to help our customers to create first class Omnichannel environments powered by API-First OMS- and mPOS applications, e-commerce solutions and PIM systems.
