

Junior Solution Architect (f/m/d)

Locations: Jena, Dresden, Leipzig, Germany

For our young start-up company, dedicated to building first-class customer experiences, we are seeking a **Junior Solution Architect (f/m/d)** for a permanent full-time position.

The Positive Minds team in Jena, Dresden or Leipzig, Germany is looking for highly motivated, experienced and passionate software or cloud solution engineers. Constant learning and delivery of results are the core characteristics of the person we're looking to hire. Dedication to software craftsmanship and a commitment to open and honest feedback complement these characteristics. We develop and customize solutions for our customers with cloud-native approaches and technologies.

YOUR TASKS AND RESPONSIBILITIES

As an experienced software or cloud solution engineer, you will assist all technical discussions with our architects and platform team members to define the best solutions and participate in design reviews. You will be a supporting role in a team dedicated to writing test-based, clean and reusable code.

YOU ...

- will assist the complete development process, from customised omnichannel solutions.
- are involved in all phases of the solution projects for the customer: from the first customer contact to the planning and implementation of the project, with partners, developers and the involvement of customers.
- are interested in the complete stack from backend to web applications. Likes to create new functionality for solutions in close collaboration with all members of the team.
- Grow into a solution partner for applications where developers and customers are involved. The transfer of services and technical coordination with the operational divisions are important milestones in this process.
- will be guided by our experienced team on your personal way to a professional architect.

YOUR PROFILE

As an experienced software or cloud solution engineer you are able to identify problems through critical thinking, you have analytical skills and in addition to your technical strengths you distinguish yourself through self-confidence, independent working methods, teamwork and clear communication?

YOU ...

- hold an University degree or successfully completed an IT related education program.
- are with confidence in the world of AWS and cloud technologies.
- have basic IT knowledge of infrastructure components
- has expertise in the areas of hosting and managed services
- have first experiences with common OpenSource application landscapes
- have experience collaborating with other Engineers in planning, prioritizing and executing assigned tasks within deadlines.
- have very good written and spoken English language skills.

EXTRA QUALIFICATIONS THAT WOULD BE GREAT TO HAVE

YOU ...

- has AWS certifications or speciality and knowledge in the field of automation
- has expertise in developing highly available, secure and fault-tolerant architectures in the cloud
- have experience in building e-commerce systems.
- are familiar with various software design models.
- have experience in solving business problems using a variety of programming languages.
- any experience in agile development methods and sprint planning is an advantage.
- have very good presentation- and communication skills.

YOUR BENEFITS

- Excellent personal and professional opportunities
- Fast and short decision paths
- Flexible work organization with home office possibilities
- Free choice of your work tools: Work with a Macbook Pro or use open systems such as Linux or Windows.
- Team meetings and events - professional and fun
- And of course a great atmosphere in the team

WHO WE ARE

We are a young start-up with locations in Jena, Dresden and Leipzig (coming soon). Our central aim is to help our customers to create first class Omnichannel environments powered by API-First OMS- and mPOS applications, e-commerce solutions and PIM systems.
